Hot Springs, Arkansas, 71913 | (501) 494-1078 | haydenbdodd@gmail.com

SUMMARY

Frontend developer with experience in React, TypeScript, and building user focused, responsive websites and applications. Skilled in modern UI frameworks and performance optimization, with a strong understanding of component-based architecture. Dedicated to creating intuitive user experiences and developing high-quality applications.

SKILLS

React, React Native, Next, TypeScript, HTML, CSS, Vite, Tailwind CSS, MongoDB, Git

PROJECTS

Personal Portfolio

November 2024 - Present

- Built using React, Tailwind CSS, TypeScript and JavaScript to make a streamlined experience showing off my skills and projects.
- Connecting Web3Forms to allow users to send messages directly with feedback or opportunities which are directed to my personal email.
- Utilizing Vercel to deploy and host the project for their ease of deployment directly from a GitHub repository and packages for analytics of users and performance of page rendering / loading.

BSE (Bang Search Engine)

2025 - Present

- Built using TypeScript, based on “DuckDuckGo” bang redirects when searching to directly point to which website you are looking for. (i.e. !yt to search your term on YouTube)
- Designed to speed up load times when requesting a query with a bang by cutting out the need to connect to DuckDuckGo’s servers. Improves request speed by 25-30%.

EDUCATION

Lakeside High School

2017 - 2021
